Sprintlog Documentation #3 mon 1/10 - sun 7/10

This week we chose to focus our efforts on adding more ways for the user to improve his/her Everbie such as, items, work, training and interactions such as snuggling with the Everbie.
in addition to these features we have decided to improve the documentation of our code by adding comments and java doc. And last but not least shall start writing on the user manual and the developer manual.
